

PIKES PEAK SOLUTIONS

SUCCESS² - ours measured by yours

integrity □ experience □ service □ innovation
communication □ teamwork □ synergy

PIKES PEAK SOLUTIONS, Inc. is a leading provider of technology solutions in Colorado.

Utilizing our team of certified professionals with their dynamic mix of vision, creativity, and in-depth experience, we deliver effective design, development, deployment, and maintenance strategies. As our name suggests, we are in the SOLUTIONS business! We key those solutions to the size and economic capacity of your business. Whether we're providing infrastructure support, creating custom applications, modeling databases, designing web sites, or implementing business portals, the PIKES PEAK SOLUTIONS team works closely with you to ensure your total satisfaction. Our drive to help you succeed through innovative technological solutions is guided by our core beliefs: **integrity, quality, and value**. We back every solution with a satisfaction guarantee. We operate under the premise that our success is tied directly to the success that we bring to you. That is **SUCCESS² - ours measured by yours!**

REPLACE FRUSTRATION WITH FULFILLMENT!

- System down when you most need it?
- System slow and sluggish - not effectively performing essential tasks?
- Service provider not readily available or ineffective?
- Experiencing network "glitches"?
- Feel like your computer infrastructure is patched together and unreliable?

At PIKES PEAK SOLUTIONS, we feel any of these circumstances is absolutely unacceptable. We pride ourselves on providing our customers with top-notch IT support services. We are there for you all the way! Initially, we analyze your present situation, assist you in establishing some economically realistic goals and employ our experts to implement them. We don't stop there! We stay in touch, check on your system at regular intervals, tune-up and revise as needed. When a critical situation arises, we are quickly available to you - within an hour in most cases. A dependable and professionally maintained infrastructure system, allows your employees to focus on what they do best - building YOUR BUSINESS! Again, **SUCCESS² - ours measured by yours!**

WEB APPLICATIONS DESIGNED UNIQUELY FOR YOUR BUSINESS!

Does your company perform a large volume of specific tasks within a network of departments and employees? Regardless of the size of your organization, customized web applications can increase your efficiency and productivity. Speed and volume, while maintaining quality control, are the essential cornerstones of today's business success. PIKES PEAK SOLUTIONS has the expertise to evaluate your present systems and formulate solutions tailored to your specific business needs!

A few examples of the dynamic web application services we offer are:

- Enhanced marketing, promotional, and customer services
- Trouble-free e-commerce capability
- Intranet/Extranet strategies - no need to be office bound, access your systems from any computer
- Convenient customer account access around the clock
- Streamlined database management and warehousing
- Creative imaging, animation, and graphic web design

We thrive on making your business our business!

BECOME A SMOOTH OPERATOR WITH PPS BUSINESS PORTAL!

Like to slide right past the competition on your way to increased profitability? Bump performance to a higher level? Building a solid systems management foundation is a major component of achieving that success. PPS Business Portal is your Intranet solution! With it, your company will eliminate communication bottlenecks-operations will flow rapidly and smoothly. PPS Business Portal streamlines routine processes, performs collaborative functions, and enhances time management.

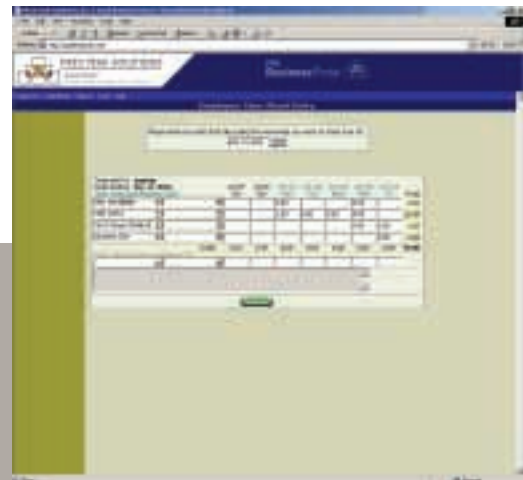

By starting with this proven user-friendly template, complete with an equally easy to use interaction model, a small to medium

The following key components lead to our successful results:

Planning - We involve your key personnel in an initial examination of your requirements to ensure a comprehensive Project Plan. Having your personnel enthusiastic about implementing changes and providing input ensures your project's success.

Professional Teamwork - A team of our most experienced professionals, headed up by a Project Manager, will audit and analyze your requirements in light of company objectives, identify risk factors, develop risk mitigation plans, define project scope, and develop a practical, cost-effective plan.

Ongoing Support - Our orientation will ensure your personnel have a solid understanding of your system and are well-equipped to maintain it. We remain available on a consultation basis to all our clients and can provide periodic inspections and testing, recommendations and implementation of enhancements as requirements change.

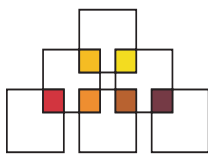

sized business can implement a complete Intranet/Extranet system in a matter of hours. You will save thousands of dollars in custom application development costs. The Portal comes with the following modules, easily adaptable to your existing infrastructure and database system:

- Time Entry and Reporting
- Expense Reporting, Approval, and Workflow
- Contacts Management
- Dynamic Publishing and Workflow
- Employee Information and HR Forms Publishing
- Secure, dynamic, role-based Navigation Access

EXPERIENCE AND TEAMWORK MATTER!
THEY MULTIPLY YOUR SUCCESS!
